One of the most pleasant events of the season was a birthday party given at the residence of Mrs. John Buntain, northeast of town, in honor of her son, Burch's, 17th birthday. About 200 guests were present and everything was just as nice as it could possibly be. Progressive croquet was the order of the evening. Olive E. **PUBLIC SCHOOLS OF HILLSBORO.**

A Card From Superintendent Major.

The Public Schools will open next Monday, September 7th, 1891, at 9 o'clock a. m.

All the pupils should hunt up their reports and have them ready to bring with them when school begins, as these are cards of admission to their several schools, and may save time and trouble for themselves as well as their teachers.

Even if pupils have failed of promotion, one can see at a glance whether any mistake has been made, and so it is an advantage still to bring the report.

The High School and the three Primary Schools will be situated in the Main street building (Institute). As one more school had to be formed in the Walnut street building and a somewhat different assignment of teachers was made, a few changes will be necessitated in the arrangement there.

Miss Hodson (A Grammar) will occupy the old High School rooms; Mrs. Marks (B Grammar, West), Miss Hodson's old room; Miss Elliott (B Grammar, East), Mrs. Marks' old room; Miss Walker (C Grammar), her old room; Miss Gamble (D Grammar, West), Miss Elliott's old room; Miss Duvall (D Grammar, East), Miss Gamble's old room; Miss Oldaker (A Primary, West), her old room; Miss Doggett (A Primary, East), Miss Duvall's old room; Mrs. Williams (B Primary, West), her old room; Miss Williams (C Primary, West), Miss Doggett's old room; Miss Taylor (D Primary, West), her old room.

The Board has decided that school shall begin at 9 a. m. and continue to 12 m., with a recess of 15 minutes; and again at 1:30 p. m. and continue till 4 p. m., with a recess of ten minutes. The D and C Primary pupils, however, are to be dismissed at 11:30 a. m. and 3:30 p. m., while the A Primary and other schools are to be in session full time.

The following rule has been adopted by the Board and will go into operation now for the first time; it is of especial interest to parents of young children and to D Primary pupils:

Children who shall attain the school age (six years) within the first month of any term may be admitted at the beginning of that term; but if they attain the school age after the first month of any term they cannot be admitted when new classes would be required for them until the first of the next term.

The 1st of September is now designated by the compulsory attendance law as the time when all children to whom provisions apply shall start to school.

The Primary Schools and the D and B Grammar Schools have been divided by taking the middle of High street as the line of separation—the same plan as followed last year.

To-day (Thursday, September 3d) I should like to see at the old High School room (north-east room, third floor) in the Walnut street building all pupils of any grade who are not in every respect arranged for the coming year's work, who have examinations to pass, who live outside the district, who have not yet been assigned places in our schools, or who shall need to see me in regard to any such matters. Let all bring their reports, to save time. All new pupils should see me at this time with the books they have been using, and anything they may have in shape of reports, grade cards, certificates of promotion, etc. This work will be continued Friday, if necessary. All new pupils, at all times, should come first to me to be assigned places.

Some changes in the text-books have been made, part of which had been put off from time to time, and others were necessitated by the recent State Text-Book law. Below the High School only the music books and a spelling for A Grammar (Reed's Word Lessons) will be different from what has been used. In the High School the time for trigonometry has been cut down to one term—the middle one—and book-keeping has been made one of the required studies and changed to the spring term of the third year of the course. For the place formerly occupied by book-keeping mental philosophy or psychology has been adopted, but no text-book has been selected. The old Latin reader will give way to a newer and fresher work, Collar & Daniel's Beginners' Latin Book. Myers' General History will take the place of Anderson's; and Gase's Introduction to Physical Science the place of Steele's.

The following books were changed because they were not on the State Book Board's list sent out to the various schools: Warner's Physical Geography, Holden's Zoology and Williams and Rogers' Book-keeping. In their places were adopted Houston's New Physical Geography, Tenny's Elements of Zoology and Bryant and Stratton's High School Book-keeping.

A general meeting of the teachers is desired for Saturday, September 5th, at 3 o'clock p. m. in Miss Hodson's room. SAM'L MAJOR, Superintendent.

They Are "In It."

**WASHINGTON LETTER.**

(From our regular correspondent.)

WASHINGTON, D. C., Aug. 28th, 1891.

If the President returns to Washington within the next three weeks as he is expected to do, he will find the White House scarcely habitable as it is not expected that the workmen can possibly finish the repairs before the first of October and to get through that early it has been found necessary to postpone a portion of the work to be done until next summer.

Secretary Foster reports our financial condition to be excellent and improving every day. He anticipates not the slightest difficulty in taking up such of 4 1/2 per cent. bonds as shall not be presented for extension at 2% on or before September 2, which is the last day that they can be extended. He does not think the amount to be redeemed will much exceed \$20,000,000, and he has an available balance of \$108,000,000 exclusive of the \$100,000,000 in the much written about "gold reserve" fund. These bonds like all issued by our Government are made payable in gold should the holder desire it, and as the Treasury has in its vaults more than \$29,000,000 in gold coin, in addition to the "gold reserve," there will be no difficulty in accommodating the owners of the bonds presented for redemption even should they all desire to be paid in gold. This state of affairs is very gratifying to everybody, but the Democratic calamity waiters who have for months been saying that the United States Treasury would be bankrupt and that when the time came to take up these bonds it would be compelled to default in the payment of them. Of course those of them who know anything knew better all the time, but having been so successful last fall in their campaign of misrepresentation they have for lack of any other principle adopted that method of fighting the Republican party.

The news of the Governor of Vermont having formally notified Secretary Proctor of his intention to appoint him to serve out the unexpired term of Senator Edmunds, when his resignation takes effect November 1st, created no surprise here, as it was only carrying out what everybody had accepted several months ago as certain to occur. Secretary Proctor has ably administered the affairs of the War Department, and while every one rejoices that he is to occupy a place that is more congenial to him there is a great deal more regret than usually follows the retirement of a member of the cabinet that he is to lay down the War portfolio. Speculation is rife as to who will succeed Secretary Proctor in the cabinet and many names are being mentioned, among them those of ex-Gov. Cheney, of New Hampshire; Senator Farwell, and ex-Representative Cannon, of Illinois; ex-Senator Spooner, of Wisconsin; ex-Senator Mahone, of Virginia; Hon. R. T. Lincoln, U. S. Minister to England; ex-Representative McComas, of Maryland; ex-Senator Ingalls, of Kansas and Gen. Alger, of Michigan.

The President is away and there is nothing to base any reliable prediction upon to be obtained here, so that everybody may guess to their hearts content, and talk up their favorite. There is reason to believe that the President has already picked out the man and obtained his acceptance of the place, but it isn't probable that his name will be officially announced until Secretary Proctor's resignation has been formally accepted, and no one here seems to know just when that will be.

Secretary Noble, as the head of the Department under which the United States Geological Survey works, was selected as the proper person to deliver the address of welcome to the members of the International Congress of Geologists, now holding its fifth triennial session in this city, and the selection was well made, as his address was an excellent one; highly satisfactory to his hearers and creditable to himself and the administration for which he spoke.

It raised a broad smile in Washington when Representative Crisp said that the contest for the speakership was a friendly one. Mr. Crisp may be friendly in his feeling towards his opponents, but they, or rather their representatives, are certainly not friendly towards him, when they are running around abusing him and trying to create the impression that he is the friend of all the Democratic lobbyists and that he will be under

Pure is one thing; wholesome, another. Pure arsenic is not wholesome. Pure ammonia, pure white clay, or pure alum cannot make a wholesome baking powder, even if it is called "absolutely pure."

Every housekeeper knows that pure cream of tartar, pure soda, pure flour, are wholesome. These three ingredients, and these three only, are used in Cleveland's Baking Powder. Cleveland's is pure and wholesome; it leavens most, and leavens best, but its special excellence is that it is perfectly wholesome.

their control if elected. This is particularly true of those who are working for Mr. Mills; they are doing everything except charging personal crookedness to bring discredit upon Mr. Crisp, and they are doing that by inference by saying that he has promised more committee chairmanships than exist, for the purpose of obtaining pledges of support. If this be a friendly contest, pray, what would Mr. Crisp call an unfriendly contest?

**The Little Nugget Company.**

The old saying, "Laugh and grow fat," was truly verified on Monday evening when Little Nugget was played at Armory Hall to a crowded house.

Little Nugget, the star, shone with unwonted brilliancy; Mr. Ed. Cogley, in this his first appearance in a prominent role as Jackie Kumpfer, was quite a success, as the delight of the audience in his songs and dances fully evinced; Barney O'Brady with his brogue and true to life make-up, a veritable Irishman; Mrs. Simpkins with her wonderful flow of natural gas and Billy Simpkins with his idiosyncy kept the house in a roar of laughter the entire evening. The Cawthorn Company played in this place about a year ago and was liked so much that it insured them a full house on their return, but Monday night there was a very decided improvement noticeable in everything connected with the play.

The manager, Mr. Charles Baker, understands his business thoroughly, and his affable and gentlemanly deportment will make him always welcome in Hillsboro.

Attention!

The surviving members of the 12th Regiment, O. V. I., will hold their eleventh annual reunion on the beautiful fair grounds at Hillsboro, September 17, which will be the anniversary of the battle of Antietam. No more fitting time than this day could have been chosen for a reunion of the 12th, and no place could have been selected which will extend to its survivors a more hearty welcome than Hillsboro. All soldiers and sailors of the late war and all friends of the same are cordially invited to attend and participate in the exercises of the day. A basket dinner will be served on the grounds, and a camp-fire will be held at night at Armory Hall. Special rates on all railroads. The O. & N.-W. and C. & O. railroads will sell tickets for one fare for round trip. Come, everybody, with baskets well filled, and let us enjoy a good day together.

By order Committee.

H. K. Thurber, a man of note in the commercial world, gives his reason for being a protectionist as follows in the American Economist: "I am a protectionist because thrift follows the enactment of wise laws; because I love my own country better than I do foreign countries; because every dollar sent abroad to purchase goods that we can produce at home makes us a dollar poorer; because it is better for this country to feed, clothe and house our own labor in this country than to support foreign labor in other countries with our money; because it is true, as Peter Cooper well said: 'No goods purchased abroad are cheap that take the place of our own labor and our own raw material.'"
